

The simple and visual way to understand and improve your production process

Evocon gives you all the tools you need to improve OEE and understand what is actually happening in production.

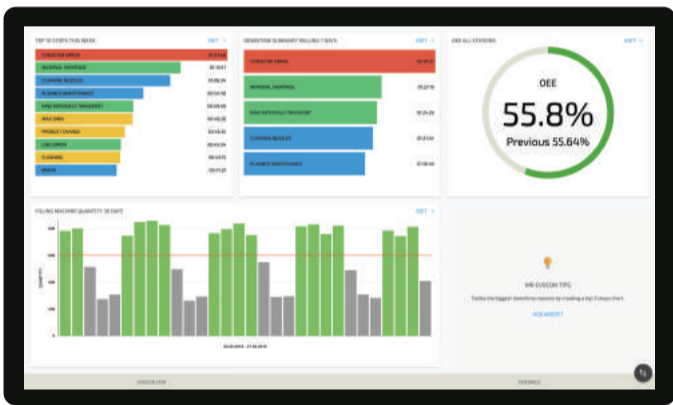

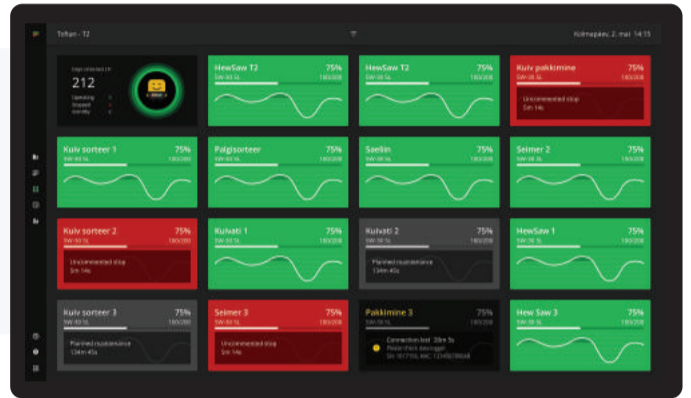

Lineview – Shift progress in real-time

Clearly understand what is the actual efficiency of your shifts. With Lineview you get detailed information on OEE, downtime, quality, performance, orders and more – visualised and made easy for everyone to understand.

Factory View – Your factory in real-time

Understanding how your whole factory is performing at any given time helps you avoid unpleasant surprises so that you can deliver on time and get the results you plan. Our Factory View is a perfect tool for this, giving you real-time information on all the machines in your production process.

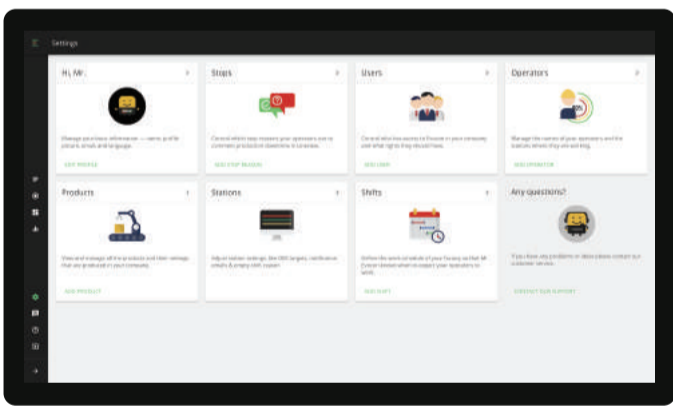

Dashboard – Personalised production intelligence

Evocon Dashboard gives you the power to track the production indicators that are most important to you. And so can everyone in your company. Your dashboard is always up to date with real-time data, KPI-s and insights that can be customised to match your exact needs.

Reports – Analyse your production data

Easily keep track of all your production data and discover opportunities for improvements with reports on OEE, time usage, downtime, quantities and cycle times. Custom reports and data export are also available.

Settings – Easily manage all your data

In Evocon, managing all your production data – production downtime reasons, operators, users, products etc. – is made really simple and user-friendly so that anyone in your company can do it.
